Note: Automatic writing or psychography is writing which the writer states to be produced from a subconscious and/or spiritual source without conscious awareness of the content-- in spiritism, spirits are claimed to take control of the hand of a medium to write messages, letters, and even entire books. Automatic writing can happen in a trance or waking state... Wikipedia.

The cave --- so huge it has its own weather system: Explorers discover a lost world with thick cloud and fogs trapped inside--!

- The cave system was discovered in the Chongqing province of China by a team of cavers and photographers
- Caver Robbie Shone, from Manchester, said a few of the caves had previously been used by nitrate miners but had not been properly explored
- The network, which includes 'cloud Ladder Hall' measuring around 51,000 metres squared, has water sources and vegetation of the floor---

Internet information::

Escapology is the practice of escaping from restraints or other traps. Escapologists (also classified as **escape artists**) escape from handcuffs, straitjackets, cages, coffins, steel

boxes, barrels, bags, burning buildings, fish-tanks, and other perils, often in combination.

From Wiki and Internet :::

Décollage, in art, is the opposite of collage; instead of an image being built up of all or parts of existing images, it is created by cutting, tearing away or otherwise removing, pieces of an original image.

Viruses made of glass

Luke Jerram is a man who works with viruses and no, he's not a virologist. He likes to show the people the beauty of viruses and yes, there is one, portrayed in these figurines made of glass that represent a strange art example.

Fumage is a surrealist art technique popularized by Wolfgang Paalen in which impressions are made by the smoke of a candle or kerosene lamp on a piece of paper or canvas
